Health and Care Videos

Health and Care Videos is part of Torbay and South Devon NHS Foundation Trust and since 2014, we have been building a library of videos that we use in our acute hospital, our work in the community, and with our staff, patients and carers.

They improve the patient and user experience of the care that we provide.

All of our videos have been developed by clinicians and specialists who work in the health and care sectors.

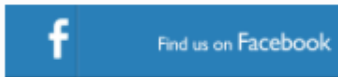

Please select from one of the categories below.

Audiology	Falls	Pain Service
Breast Care	Fracture Clinic	Pain Service professionals
Cardiology	Gastroenterology	Pain Management team
Care of the Elderly	Hearing aids	Physiotherapy
Carers	Heart Failure	Podiatry
Children's day case surgery	Hip and knee replacement	Radiology
Child Health	Learning Disabilities	Rheumatology
Diabetes	Maternity	Shoulder rehabilitation
Diabetes foot clinic	Nutrition & Dietetics	Speech and Language Therapy
Endoscopy	Osteoporosis	Trauma and Orthopaedics

Support videos

To help you to benefit fully from our care and support, we have prepared some videos that will we hope will help you, your family, friends and carers to understand what is involved in managing heart failure, and help you to feel less anxious about what is involved in your care and treatment.

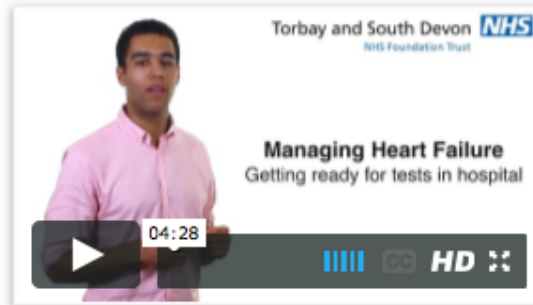

If you have any questions, the main [Cardiology](#) page will provide you with more details about contacting us or you can speak to your Heart Failure Nurse or GP.

Map out the headline demands on a GP practice for a condition such as back pain or COPD that is very resource hungry.

Where could you use video to fundamentally reduce the demands on GP practices and the system?

Stay high level and don't forget about the patient experience.
